

## Full Stack Developer – Ascential, London

We're looking for a Senior/Mid-Level Full Stack Developer to join our team in central London.

By way of background: Ascential does business intelligence (helping people in companies figure out what's going on in the world) and events (1000s of people coming together to learn and make connections and celebrate). Business areas include retail, creativity (yep, that's a business area), fintech, fashion, property.

We work in cross-skilled teams of 6-8 people, including developers and designers, on mostly greenfield projects for many parts of Ascential. We're building web and mobile applications to bring together the physical and digital experiences of Ascential's industry-leading events and business intelligence platforms.

We believe in TDD, clean architecture, pair programming, and listening to each other. We're self-disciplined yet flexible, and regularly review our practices during weekly retrospectives and sprint reviews.

This role will suit you if you:

- Enjoy learning new technologies. We work in Elixir, React and Flutter, but you don't need to have used these before. Maybe you've used Python, Dart, Ruby, or Erlang and you're open to trying something new
- Like to think in terms of cloud technologies — we use AWS and GCP
- Have experience with web or mobile development, relational databases and web application deployment
- Want to share knowledge and experience, particularly in guiding more junior developers, to improve the code quality and practices across the team
- Want to speak directly to the customers and stakeholders who will be using the platforms you build
- Want to join a highly functional team with developers of all levels, designers and product managers

You might work on:

- Greenfield Flutter App used by 10,000s of people at our international events
- Develop a digital content platform which enables and inspires creatives to produce groundbreaking work in the ad industry

Benefits:

- 25 days of holiday per year
- Great learning and development opportunities
- Pension
- Flexible approach to working from home
- Bonus
